Commented [A1]: Hello,
I am looking forward to proofreading your
references for you. I will do my best to correct all
mistakes and point out missing information in my
comments.

Commented [A2]: APA centers and bolds the
title for the references. These should be double
spaced and use a half inch hanging indent.

Commented [A3]: Journal and publications
names should be in title case.

Commented [A4]: Consider providing the doi or
URL whenever they are available. These are not
followed by a period.

Commented [A5]: APA 7th edition writes out up
to 20 authors. An ellipsis is used after the 19th
author, but no ampersand. Please confirm the
additional author is correct.

Commented [A6]: APA does not abbreviate
journal titles. These should be written out in full
and should be in italics.

Commented [A7]: This was missing the volume,
issue, pages and doi. Please review and confirm
these match your intended source.

Nursing. 2005; 105(7):, 56–64. <https://doi.org/10.1097/00000446-200507000-00031>

Commented [A8]: Please confirm the page range and doi.
